SKILLS

WEB DEVELOPMENT

HTML5 CSS3 JavaScript

PHP

DATABASE

MySQL SQL phpMyAdmin

TOOLS

VS Code Git / GitHub

Laragon

HARDWARE

Arduino Uno RFID (MFRC522)

OTHER

System Analysis UI / UX

Info Security Troubleshooting

Jorge Jerix I. Banagan

Information Technology Student

Profile

4th-year BS Information Technology student focused on web development, system development, and databases. I enjoy turning an idea into a working system, from the first line of code to a finished product, and I learn from every problem I solve along the way.

Projects

Kapehan ni Amang – Point of Sales System

Academic / capstone project

PHP MySQL JavaScript

- Developed core POS modules with role-based access for Admin, Cashier, Student, and Faculty users.
- Designed and integrated the MySQL database; worked on inventory, product, payment, and order management.
- Built receipt generation and printing, and contributed to UI/UX improvements, testing, and debugging.

Liwanag Cafe – Reservation & Ordering System

Web development project

PHP MySQL JavaScript

- Web-based cafe system with menu, online ordering, table reservations, user accounts, and an admin dashboard.
- Worked on customer-facing pages, login and registration, database connection, and system testing.

RFID-Based Smart Library Management System

Arduino / hardware project

C++ Arduino Uno RFID (MFRC522)

- Prototype that identifies library members and books by RFID card or tag, with LED and buzzer feedback.
- Assembled and wired the circuit (reader, LEDs, buzzer, breadboard) and tested scanning and responses.
- Troubleshoot connection problems and helped prepare the project documentation.

Certifications & Seminars

Certificate of Participation – 1st EARIST Cavite Research Colloquium

EARIST – Cavite · March 26, 2026

Theme: "Innovation, Research, and Community Impact"

Focus Areas

Web Development System Development Databases UI / UX Cybersecurity
